Third Annual International Finance Workshop

The West Coast International Finance Workshop alternates between UCSC and Santa Clara University and is organized by UCSC Professor Michael Hutchison and SCU Professor Helen Popper. It was held on October 17th at Santa Clara University this year. The workshop setting allows the opportunity for participants to present new in-progress research in an informal setting. Participants and presenters included UCSC faculty and graduate students as well as faculty from Santa Clara and other universities throughout the west coast. A diverse set of papers is presented at the workshop each year, but all relate to the topic of international finance and/or open economy macroeconomics. Formal discussants critiqued each paper, followed by floor discussion.

The objective of this workshop is to foster and encourage research in international finance, provide an opportunity for UCSC graduate students to be exposed to the most recent research and interact with faculty from other universities, and keep UCSC as a leader in the field of international finance.
